

ANDRII ZAITSEV

SENIOR SOFTWARE ENGINEER

P: (380) 997-814-218

E: adryathic@gmail.com

L: www.linkedin.com/in/zaitsev-andrii

OBJECTIVE:

Experienced software engineer with a proven track record in designing, developing, and deploying innovative solutions to complex technical challenges. Eager to leverage over a decade of expertise in software development, team leadership, and agile methodologies to contribute to high-impact projects and drive organizational success. Seeking a Senior Software Engineer role where my skills in React, TypeScript, and modern frontend technologies can enhance user experiences and deliver business value

SKILLS:

- **Core:** JavaScript (ES6+) TypeScript, React, Redux, RxJS
- **Frameworks & Libraries:** React Native, AngularJS, Lodash, Webpack, Babel, Material UI, SCSS
- **API & Realtime:** REST API, GraphQL, Socket.io, Firebase
- **Databases:** PostgreSQL, MySQL
- **Tools:** Jira, Confluence, Bitbucket, GitHub, GitLab, Figma, Zeplin, Postman, Docker

WORK EXPERIENCE:

Senior Software Engineer (React/Redux)

Jan 2018 - Feb 2025

Innovects/Ummanu

Ummanu is a global leader in telemedicine, providing services to over 18 million clients and delivering more than 2 million remote consultations annually.

- Developed core platform features, including video and SIP call systems, interactive modules, and user-friendly interfaces.
- Optimized app performance for scalability and global use.
- Contributed to the development of administrative consoles for management and analytics.
- Integrated APIs and third-party services to enhance product reliability.

FrontEnd Developer (React Native)

Aug 2017 - Jan 2018

Empeek

Empeek specializes in developing mobile applications for healthcare and sports. The primary project was a platform for organizing outdoor training sessions.

- Developed mobile applications for iOS and Android, delivering an intuitive user interface.
- Enhanced app performance and usability for outdoor training enthusiasts.

FrontEnd Developer (Angular)

Jul 2016 - May 2017

ESportsField

ESportsField is a platform for managing and automating esports tournaments, enabling seamless organization of matches and efficient competition management.

- Developed the application frontend using AngularJS, focusing on a user experience for tournament participants.
- Implemented media widgets to display game highlights and match data dynamically.
- Designed and developed tournament grids for visualizing match progress and schedules.

Web Developer

Jan 2013 – Jul 2014

Ahead-Gaming

Ahead-Gaming was a startup project for a Ukrainian cyber sports organization, aimed at establishing an online presence and supporting community activities.

- Co-founded the organization and developed its website from scratch using Joomla CMS and PHP.
- Built functionality to host large-scale tournaments with over 10,000 teams.
- Ensured scalability and flexibility for future updates while maintaining a user-friendly experience.
